

# Dhruv Singal

---

<b>Contact Information</b>	Email: singaldhruv.ds@gmail.com Phone: +91 965 159 5511	
<b>Education</b>	<b>Indian Institute of Technology Kanpur</b> <i>Bachelor of Technology, Computer Science and Engineering</i> CPI: <b>9.5</b> (on a scale of 10)	2016
	<b>DAV Public School, Kota, India</b> <i>All India Senior School Certificate Examination</i> (12th standard) Score: <b>92.2%</b>	2012
	<b>Maharaja Agrasen Vidyalaya, Ahmedabad, India</b> <i>All India Secondary School Examination</i> (10th standard) CGPA: <b>9.6</b> (on a scale of 10)	2010
<b>Awards and Achievements</b>	<ul style="list-style-type: none"><li>– Awarded the <b>OP Jindal Engineering and Management Scholarship</b> 2013 for excellence in academics and leadership</li><li>– Awarded the <b>Certificate of Merit for Academic Excellence</b> by IIT Kanpur for the term 2012-2013</li><li>– Ranked in <b>Top 0.1%</b> (among 479,000 students) in IIT-JEE 2012</li><li>– Ranked in <b>Top 0.1%</b> (among 1,100,000 students) in AIEEE 2012</li></ul>	
<b>Areas of Interest</b>	Applied Economics, Game Theory, Data Mining, Applied Machine Learning	
<b>Technical Skills</b>	<i>Languages:</i> Python, C, C++, MATLAB, R, Java, Oz, Ruby <i>Web Development:</i> JS, PHP, HTML, CSS, MEAN stack, MySQL <i>Other Tools:</i> Apache Hive, Shell scripting, Perl, L <sup>A</sup> T <sub>E</sub> X, Git, TensorFlow	
<b>Test Scores</b>	GRE: Verbal Reasoning - 167, Quantitative Reasoning - 170, Analytical Writing - 4.5	
<b>Patents</b>	<ul style="list-style-type: none"><li>– <i>Techniques for Enhancing Content Memorability of User Generated Video Content</i> (USPTO, pending) with Manav Kedia, Akhil Shetty, Sumit Shekhar and Phaneendra Angara</li><li>– <i>Forecasting Potential Audience Size and Unduplicated Audience Size</i> (USPTO, pending) with Kushal Chawla, Yash Shrivastava, Ritwik Sinha, Atanu Ranjan Sinha and Deepak Pai</li></ul>	
<b>Relevant Courses</b>	<ul style="list-style-type: none"><li>– <i>Theory:</i> Algorithmic Game Theory, Theory of Computation, Data Structures and Algorithms, Algorithms - II</li><li>– <i>Systems:</i> Operating Systems, Principles of Database Systems, Computer Systems Security</li><li>– <i>Machine Learning:</i> Machine Learning: Tools, Techniques and Applications, Learning with Kernels, Probabilistic Machine Learning</li><li>– <i>Programming Languages:</i> Compiler Design, Principles of Programming Languages</li><li>– <i>Mathematics:</i> Abstract Algebra, Discrete Mathematics, Probability and Statistics, Logic in Computer Science, Linear Algebra, Analytical Calculus, Partial Differential Equations, Complex Algebra</li><li>– <i>Humanities and Social Sciences:</i> Applied Game Theory, Academic Writing</li></ul>	

Work Experience	<b>Research Fellow</b> Jun 16 - present <i>BigData Experience Lab, Adobe Research Bangalore</i> <ul style="list-style-type: none"> <li>– Working on projects in data mining, game theory, computer vision, machine learning and forecasting, with applications in Adobe Marketing Cloud</li> <li>– Associating with product and engineering teams to understand the industrial scenario and use cases</li> <li>– Developing prototypes for potential product integrations and intellectual property</li> </ul>
	<b>Research Intern</b> May 15 - Jul 15 <i>BigData Experience Lab, Adobe Research Bangalore</i> <ul style="list-style-type: none"> <li>– Defined and analyzed the notion of memorability for videos, using machine learning and computer vision</li> <li>– Carried out feature extraction with state-of-the-art image and video processing techniques and deep learning</li> <li>– Collected the ground truth by a crowdsourced test on Amazon MTurk</li> <li>– Demonstrated application of memorability to video summarization</li> <li>– Work submitted to <b>CVPR 2017</b> (result awaited)</li> </ul>
Research Experience	<b>Symbolic Parsing of Grammars</b> Dec 15 - Apr 16 <i>Undergraduate Project with Prof. Subhajit Roy, CSE IITK</i> <ul style="list-style-type: none"> <li>– Studied the theory of LL(1) parsers and related topics in predictive parsing</li> <li>– Proposed and implemented a new system to build predictive parsers using constraint solving</li> <li>– Work submitted to <b>CAV 2017</b> (result awaited)</li> </ul>
	<b>Coalition Formation Games</b> Aug 15 - Apr 16 <i>Undergraduate Project with Prof. Sunil Simon, CSE IITK</i> <ul style="list-style-type: none"> <li>– Studied the field of hedonic games with emphasis on stability concepts using techniques of algorithmic game theory</li> <li>– Proposed a new subclass of hedonic games, shared preference hedonic games and investigated some algorithmic properties of this game model in detail</li> </ul>
Course Projects	<b>Gemhunter - Compiler for Ruby to MIPS</b> Jan 15 - Apr 15 <i>Compiler Design, Prof. Subhajit Roy</i> <ul style="list-style-type: none"> <li>– Implemented an end-to-end cross compiler in Python using the PLY (Python Lex-Yacc) package, supporting a tweaked version of Ruby</li> <li>– Selected as the <b>best project</b> in the course</li> <li>– Supports imperative and object orient programming paradigms with implicit static typing and type checking</li> <li>– Included inheritance of instance variables and methods by method dispatch over the whole inheritance hierarchy</li> </ul>
	<b>Basic Oz Interpreter</b> Aug 15 - Nov 15 <i>Principles of Programming Languages, Prof. Satyadev Nandkumar</i> <ul style="list-style-type: none"> <li>– Implemented a meta-circular interpreter for a declarative sequential model of Oz</li> <li>– Used functional programming to parse the abstract syntax tree with single assignment store and multistack of semantic statements</li> <li>– Main features included pattern matching, closures and non-preemptive multi-tasking</li> </ul>
	<b>Internet advertising and ad-blocking software</b> Jan 16 - Apr 16 <i>Applied Game Theory, Prof. Vimal Kumar</i> [Report] <ul style="list-style-type: none"> <li>– Studied the case of the strategic interactions involved between various parties in</li> </ul>

- case of Internet advertising and ad-blocking software
- Devised game theoretic models for the situation and used equilibrium concepts to analyze the models

**Data Compression using Bayesian Inference** Jan 16 - Apr 16  
*Probabilistic Machine Learning, Prof. Piyush Rai* [Report]

- Studied the basic concepts of sequence modelling and data compression
- Analyzed the state of the art models used for Bayesian data compression - PAQ, PPM-DP and Sequence Memoizer
- Explored various properties of PAQ to suggest some potential improvements in the mixers used

**Study of kernel SVM approximation methods** Aug 15 - Nov 15  
*Learning with Kernels, Prof. Harish Karnick* [Report]

- Analyzed two state of the art kernel SVM approximation algorithms - LDKL and DC-Pred++ in great detail
- Studied the background of kernel approximation methods through landmark papers like Rahimi and Recht, 2007

**Extended NachOS** Aug 14 - Nov 14  
*Operating Systems, Prof. Mainak Chaudhari*

- Extended the system call library by implementing system call handlers for Fork, Exec, Join, Yield, Sleep and Exit system calls
- Provided support for process scheduling according to UNIX, FIFO, Round Robin, Shortest Job First and Non-Preemptive scheduling algorithms
- Implemented page replacement by using Random, FIFO, Least Recently Used and Least Recently Used Clock algorithms

**Bike Sharing Demand** Jan 15 - Apr 15  
*Machine Learning: Tools, Techniques and Applications, Prof. Harish Karnick* [Report]

- Participated in a Kaggle challenge to forecast the use of a city bikeshare system
- Experimented with multiple learning models in Python to arrive at an ensemble of forest based models to give highly accurate predictions
- Achieved a rank in **top 1 percentile** among 3000+ teams participating in the challenge worldwide

**Finite State Machine Learning Module** Nov 14  
*Computing Laboratory II, Prof. Arnab Bhattacharya* [Report]

- Created an online learning module for participants to enhance their understanding of finite state machines
- The module consisted of practice mode and quiz mode for various kinds of automata

**Developmental Projects** **Advanced Audio Equalizer** May 13 - Jun 13  
*With Programming Club, IITK*

- Developed a Java application to create an equalizer with features like volume, pan, balance and visualizer, with an intuitive GUI
- The app applied frequency filters for audio files, to play the sounds of only certain frequency range
- Implemented FFT on a buffer of audio samples in a file and extract the desired frequency sounds

**Picture comment application** Oct 13  
*With Yahoo! Team at HackU IITK*

- Created a Google Chrome extension to automate the process of adding photo comments to Facebook stream with overlaying text (memes)
- Used Facebook PHP SDK and Open Graph API, to post the comment to the Facebook stream

## Positions of Responsibility

**Tutor for ESC101A, IITK** 2015-2016

Faculty Instructors: *Prof. Nitin Saxena (Fall) and Prof. Sunil Simon (Spring)*

- Student Instructor for the core institute course *Fundamentals of Computing* for two semesters
- Supervised weekly tutorials and problem solving sessions
- Assisted the instructor in designing course material, quizzes, labs and exams

**Academic Mentor, Counselling Service, IITK** 2013-2014

Organized hall level and institute level remedial classes for academically deficient students

**Core Team Member (Academics), Avanti Fellows, IITK Chapter** 2013-2014

Provided academic guidance and assistance in Physics, Chemistry and Mathematics to the selected high-school students from low-income households

**Student Guide, Counselling Service, IITK** 2013-2014

Mentored a group of eight students during their first year at the institute, providing emotional support and academic guidance

**Editor, Vox Populi, IITK** 2014-2015

Supervised the publication of *Vox Populi*, the campus newsletter of IITK and the management of the web version

**Student Member, Department Undergraduate Committee, CSE IITK** 2014-2015

Involved in the liaison of department with the institute for matters related to academics and welfare of the UG students in CSE department

## Extra Curricular Activities

- Performed in the English play *The Whole Shebang* and a street play with Dramatics Club, IITK
- Card and board games enthusiast and regular member of the Card and Board Games Club, IITK
- Proficient in squash, volleyball, association football and swimming
- Intermediate level guitar player
